

Does adapting LPWM improve planning beyond training the planner?

No additional benefit established | 1 epoch / 1 seed | Internal development: 1,024 scenes, 1,021 valid PDMS

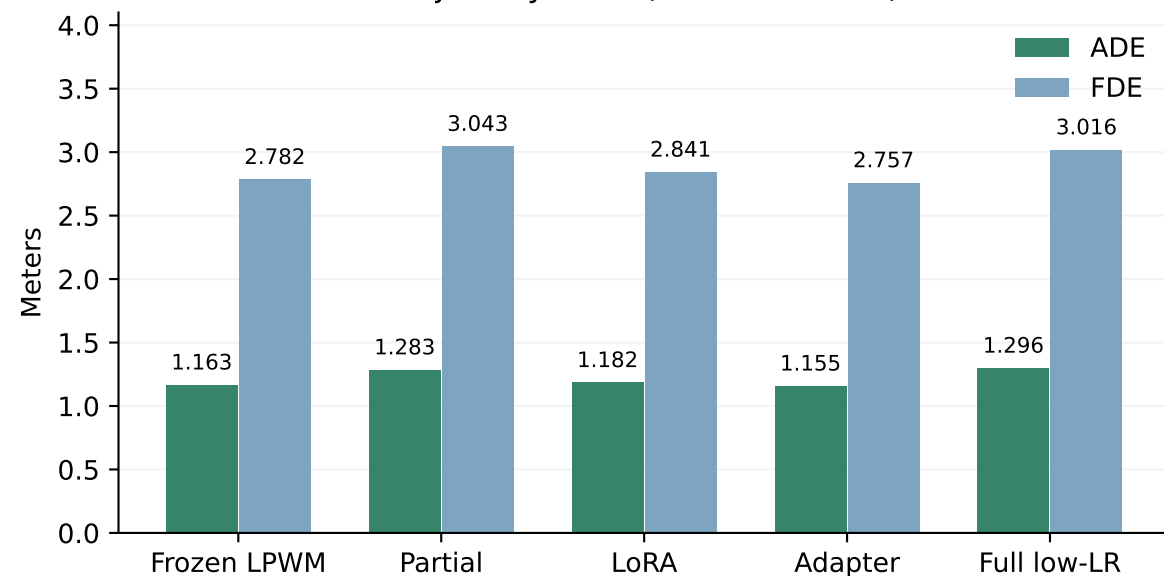

PDMS on the common development panel

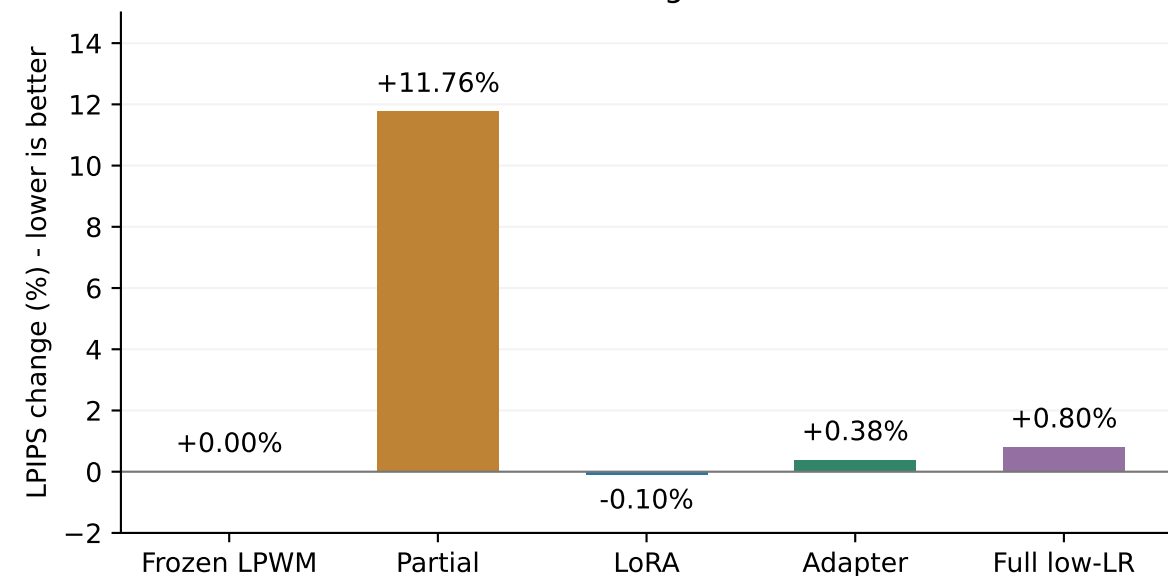

Adaptation minus frozen: paired 95% intervals

Trajectory error (lower is better)

Future-video error change from frozen LPWM

40-recording paired bootstrap; no seed uncertainty. Full uses a different LR schedule / intent location. NOT official navtest.
